

(540) Foam Encased 3ZONE 13.75ga 6"

- High Coil Count- GREATER SURFACE COVERAGE and Less Gaps= more responsive innerspring and less potential for pocketing of filling material. 23% more coils than a 336 bonnell.

INNERSPRING	Twin	TwinXL	Full	FullXL	Queen	King	Cal. King
(540)	253		368		540	575	546

- 3ZONE- Greater Coil Density in middle 1/3 by moving coils closer together. This firms up the middle 1/3 zone for added firmness and support.
- Symbol Exclusive Design- This is a Symbol unit.
- OPEN COIL DESIGN (vs knotted bonnell)- Coil is designed to be soft on the surface and progressively firm up as weight is applied. The hinge-flex design on the coil allows coils to work more independently and contour to the body.

- HELICAL LACING WIRE IS SEWN HEAD TO FOOT- Less partner disturbance.

- HIGHER TENSILE STRENGTH WIRE
